Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Wilson et al. (U.S.6296377).

Wilson discloses a convertible modular lantern having:

Regarding claim 1 as shown in (fig. 3), a light fixture body (10), a mount (12) for the light fixture body for attachment to a support structure (54), and a locking mechanism (40) for nonthreadably releaseably coupling the light fixture body or lantern (10) to the mount. A first portion of the locking mechanism (40) attached to the light fixture body, a second portion of the locking mechanism (40) attached to the mount whereby the, light fixture body is attached to the mount.

Regarding claim 2, coupling the light fixture body or lantern (10) to the mount includes twist locking (40).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2875

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wilson ('377) in view of Goralnik (U.S. 4,303,968).

Wilson ('377) discloses a convertible modular lantern having:

Regarding claim 3, a method of providing a light fixture assembly or shade assembly (38) having a light fixture body (38), a post mount or tail (162), a coach mount (10) and a finishing piece (not numbered as shown in fig. 22) selecting, an appropriate mounting piece (36), and attaching the appropriate mounting piece (36) and the finishing piece to the light fixture body without using tools.

Wilson ('377) does not teach a chain mount as applied to claim 3.

However, Goralnik ('968) teaches a mounting assembly for a chandelier-type light fixture having a chain mount.

It would have been obvious to one having ordinary in the art at the time the invention was made to use the convertible modular lantern of Wilson ('377) with the chain mount taught by Goralnik ('968), since the chain mount of Goralnik ('968) would provide the convertible modular lantern of Wilson ('377) with a light fixture, thus giving an ecstatic appearance hanging from the ceiling.
